

Elite 780

Portable, wireless POS terminal

The Elite 780 wireless POS terminal is a compact, lightweight and portable long-range radio frequency terminal. Capable of handling debit/credit/EBT or smart card transactions at the point-of-service, the Elite 780 is the answer to improved customer service when a fully portable, wireless terminal is needed for transaction convenience.

Portable, wireless POS terminal

TECHNICAL CHARACTERISTICS

The Elite 780 is targeted to mobile and service/hospitality businesses who wish to take the payment terminal to the customer. The Elite 780 comes complete with built-in thermal printer, secure PIN entry, smart card reader, magnetic stripe reader, wireless modem and rechargeable battery pack. All these features are incorporated in its compact design, weighing only 1.7 lbs. (.77 kg). This portable payment solution is ideal for:

- Home delivery services (grocery, pharmacy, fast food, couriers)
- Portable sales kiosks
- Sports/event stadium sales
- Taxi cabs
- Restaurants

A Simple-to-Use Compact and Modern Terminal

- Light-weight and compact all-in-one design provides for a truly mobile transaction solution
- Works on Mobitex or CDPD networks, providing optimum coverage in North America and 22 countries around the world
- Transactions are completed in 5-8 seconds, faster than most dial-based EFT terminals
- Ergonomic design includes bi-directional magnetic stripe reader, simple-to-change paper compartment and ATM style keypad

Secure Transactions

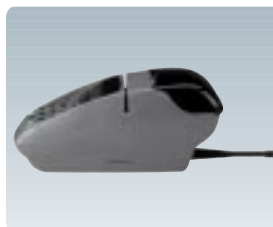

The Elite 780 operates on the digital data networks for increased security of transactions. Ingenico's UNICAPT® technology ensures software applications are developed in a secure and modular fashion. Programmers can change application modules without affecting other parts of the application and new application modules can be added to existing applications without re-certification of the whole program. Software application modules can also be used in other Elite products.

Smart Card Ready

- Future smart card requirements are already built-in
- Can handle up to 4 SAM slots to provide flexibility and investment protection
- Capable of handling multi-application cards
